

Prior Authorization Decision Notice

Date: March 22, 2025

PA Reference: PA-2025-0847291

DECISION: DENIED

MEMBER INFORMATION

Member Name:	Sarah Mitchell
Member ID:	MBR004523
Date of Birth:	06/14/1978
Plan:	UHC Choice Plus PPO (PLN-PPO-003)
PCP:	Dr. James Rivera, MD - Internal Medicine

PRESCRIBER INFORMATION

Provider:	Dr. Linda Chen, MD
Specialty:	Endocrinology
NPI:	1234567890
Provider ID:	PRV000847
Facility:	Optum Care Endocrinology - Dallas, TX

MEDICATION REQUESTED

Drug Name	NDC	Drug Class	Qty / Supply	Est. Cost
Ozempic (semaglutide) 1mg	00169-4132-12	GLP-1 / Diabetes	3mL / 28 days	\$892.47

CLINICAL VALUES

Measure	Value	Date	Reference Range
HbA1c	8.4%	02/28/2025	< 7.0% (ADA target)
BMI	34.2	02/28/2025	18.5 - 24.9
Fasting Glucose	186 mg/dL	02/28/2025	70 - 100 mg/dL
eGFR	82 mL/min	02/28/2025	> 60 mL/min

Primary Dx: Type 2 Diabetes Mellitus (ICD-10: E11.9)

Secondary Dx: Obesity (ICD-10: E66.01)

STEP THERAPY STATUS

Per UHC Formulary Policy FRM-2025-GLP1, Section 4.2, the following step therapy must be completed:

Step	Medication	Tier	Required Duration	Patient Status
Step 1	Metformin	Tier 1 (Generic)	90 days at max dose	COMPLETED (26 mo)

Step 2	Sulfonylurea (Glipizide)	Tier 2 (Preferred)	90 days at max dose	INCOMPLETE *
Step 3	GLP-1 (Ozempic)	Tier 5 (Specialty)	PA Required	REQUESTED

* Glipizide prescribed at 10mg daily for 9 months. Max dose is 20mg daily. Records do not document titration to max dose or clinical failure at current dose.

DENIAL REASON

Step therapy requirement not met. GLP-1 receptor agonists require documented failure of or intolerance to at least TWO oral antidiabetic agents at maximum tolerated doses for a minimum of 90 days each. Glipizide has not been titrated to maximum dose (20mg daily) and no documentation of clinical failure or adverse reaction at current dose was submitted.

Clinical Review Basis: NCQA/HEDIS Comprehensive Diabetes Care guidelines, UHC Clinical Policy Bulletin CPB-0372 (GLP-1 Receptor Agonists), UHC Commercial Formulary eff. 01/01/2025.

APPEAL RIGHTS

You have the right to appeal this decision within 180 days. Submit clinical documentation demonstrating: (1) titration of Glipizide to maximum tolerated dose with inadequate glycemic control, OR (2) documented adverse reaction or contraindication to dose escalation.
